# TUBIES

6-5-01

## Swamp milkweed

Took brief look before starting up to Tubies Residence.

Mr. Tubies saved us the trip & came down to speak w/us.

Very unpleasant exchange occurred after I identified myself & indicated my purpose.

### In summary

- Mr. Tubies indicated he is anti government for interfering w/his plans.
- We indicated that a general permit would cover what he has done but he has refused to get one.
- He indicated it is his property & he does not plan to get one - he will do as he pleases.
- He will not do anything except fulfill his plans to establish a trailer court.
- He is apparently an immigrant & gave a long description of all his lifetime problems etc.

When I indicated he still must get a permit he became even angrier & I indicated we would leave. Nothing positive was to be accomplished at this point. Will send CPD & Restoration/permit request.

**Importance:** High

Rick, I would like to refer this site for enforcement but I'm hesitant because he will be a no show (your not going to get a penny out of this man/nor have him show up at any enforcement hearing). The only way you could interfere with him would be a field order and even then he'll probably just ignore the order. If he happens to develop the 14 acre tract into a mobile home park I suppose I could hold up his NPDES permit, if he applies for it. He flat out told Frank Plewa and I that he will complete this work regardless. I will send out another inspection report and letter based on todays meeting between Tubies, Frank Plewa and I. He again referenced us as fascists and he once again brought up the goverment involvement at Waco during his heated conversation with Frank Plewa. Please get back to me about this. I don't wish to waste my time if nothing is going to be done to this person. This person is scary! Rusty P.S. The sad thing is that he most likely would qualify for a GP-7 permit.

**Importance:** High

I just called Mr. Tubies. He did receive my letter dated March 26, 2001. He blames me for the problem. He was very upset at me and even made a threat about another Waco situation brewing? He hung up on me before I could finish. As far as I'm concerned, the site is all yours. I've tried voluntary compliance and it did not work. As of April 3, 2001, the site conditions remain the same as before. Rusty
